THE FUTURE OF JUICE
 October 23, 2019 - 10 -12.30 am

Cibus Tec
 Innovation Lab
 Hall 4 - 1st Floor

JUICE WORKSHOP AT CIBUS TEC

-hosted by the International Fruit and Vegetable Juice Association (IFU)

Once again, experts of the juice industry's innovation and technology departments will gather at 2019's Cibus Tec to present ideas for the future of juice.

Join us on Wednesday, 23rd October, to listen to the following topics and discuss questions: Plant Based Nutrition **Fabio Aliotta, CEO of Nutrafood** (a member of Doehler Group), will give us an overview about plant based nutrition and what role it can play in the juice industry.

The Sustainability of the Juice Industry.
David Berryman, CEO of David Berryman Ltd, is well known for his out-of-the-box-thinking - and we can be excited which (critical) views he has about his own industry!

An Update on Thermal and Non-Thermal Stabilization Methods

Massimiliano Pelacci, CFT S.p.A. and University of Parma, a specialist for this topic and member of the IFU Working Group for Thermal and Non-Thermal Stabilization Methods, presents an overview of the reduction kinetics as well as an update from the three standpoints of microorganisms inactivation, enzymes inactivation, nutrients and secondary compounds preservation.

In addition, **John Collins, IFU Executive Director**, will explain what has been changed and renewed within the IFU methods, IFU recommendations and what other guidance IFU can offer for the juice industry. This will be extremely important for colleagues from quality department, but can also help your sales team in giving them a better understanding for the quality parameters of your products, no matter if they are working in purchasing or selling.

There will be plenty of room for questions and answers. Please make sure to register in time to receive an invitation to download the "Juice Events" app. With this app, you can ask questions during the presentation that will be answered in a panel and get in touch with the speakers and other participants.

REGISTRATION

www.cibustec.it/convegni-ed-eventi/ifu/

The workshop participation is free but it is necessary to register.

Those who are registered will receive a free invitation to enter Cibus Tec valid on October 23 only.

Simultaneous translation
 Italian/English available
